

Vehicle Stoppers

Key Product Features

- Easy Installation** Quick and easy to install and can be swiftly relocated
- Safety Profile** Asymmetric profile for maximum resistance without wheel trapping
- High Visibility** High visibility yellow markings moulded into the product
- Environment** Recycled product made in the UK

Vehicle Stoppers are an effective way of protecting walkways, buildings and equipment. Rediweld offers three types of Vehicle Stopper. The 80mm high CarStop is ideal for car parks. The new 115mm high CoachStop suits lower, larger vehicles like Coaches and Buses and for HGV's Rediweld offers the 150mm high TruckStop. All products are designed to prevent vehicle trapping.

CarStop

CarStop is for car parks and especially useful for retail or community areas where access is tight.

TruckStop

TruckStop is for distribution and warehouse locations, as well as infrastructure sites such as ferry ports.

CoachStop

CoachStop is for coaches and buses and lower vehicles.

Vehicle Stoppers

Model	Height (mm)	Length (mm)	Width (mm)	Fixings	Weight (kgs)
CarStop	80	1000	140	3	7.0
CoachStop	115	1000	220	5	15.0
TruckStop	150	1000	300	5	25.0
